SKILLS

- ReactJs, Redux, HTML5, CSS, JavaScript, Bootstrap, NextJs, NodeJs, MongoDB, Express, MySQL, MongoDB Atlas, Gatsby, Flutter, ThreeJs, RestApi, GraphQL, Reactstrap, Material UI, ChakraUI, ChartJs, Tailwind CSS, Nodemailer, Sequelize.
- **Tools:** Visual Studio Code, Code pen, GitHub,Git, Netlify, AndroidStudio, Emulator, Ms Excel, and other office tools.
- **Interpersonal Skills:** Leadership, Teamwork, Problem-solving, Communication, Decision making.

WORK EXPERIENCE

- Working as a **Full Stack Developer** in Itera Solutions.
  USHJA - a live hunter jumper association website where handled email scheduling, PDF and Excel exports with filter checks using SQL Sequelize queries. Improved performance of PDF downloads by converting raw queries to Sequelize queries. Managed end-to-end functionality and maintained industrial code standards in agile methodology. And worked on automation testing(Jasmine).
- Worked as a **Frontend Developer Intern** in Futuryze Digital Venture Studio Pvt Ltd for 4 months.
  Last9 – a live project where I created responsive static pages using Gatsby(react) with Tailwind CSS, Animations using Lottie and improved the website's performance using LazyLoading, optimized images in webp formats.
- **Full Stack MERN Developer** trainee in EdYoda Digital University - 6 months.

TECHNICAL EXPERIENCE

- **React-redux -** State management tool Redux was used to store product data for adding and removing table data in this project. And for Icons and Modals, Material UI and Reactstrap dependencies were used.
- **Sign-up Page -** In this NodeJs and MongoDB were used where users' data are passed to MongoDB Atlas through API using CRUD operations when they enter their sign-in details.
- **Clothing Web -** With the help of vanilla Js, HTML, and CSS this project was created where users can add items to the cart and get the details of the cart items and there total cost of the added products on the check-out page.
- **Food Meal Web –** It is a dynamic web where data is added using API and we can get data of the desired meal by searching the keyword in the input field and recipe details and video can be viewed in the Modal tab.
- **Quiz App –** In this quiz app, the user can take the quiz and check their score, it is a dynamic web build using JavaScript, CSS and HTML5.

CERTIFICATION & COURSES

- **ReactJs** certification from **EdYoda Digital University**.
- **ReactJs** certification from **HackerRank**
- Basic in Python, Data Analysis & Data Visualization in Python - **Cognitive Class**.

PROJECTS

- Last9 -: https://last9.io/
