

Frontend Engineer with 3+ years of experience building high-performance, production-grade web applications using React, TypeScript, and Next.js. Led a 4-member engineering team delivering fintech and AI-powered platforms across gold valuation, document analysis, and waste management domains. Strong experience in real-time state management, payment flows, authentication, and reliability-focused UI systems. Transitioned into software engineering through self-study and a full-stack bootcamp, bringing a structured analytical mindset from an academic science background.

SKILLS

- **Frontend:** JavaScript (ES6+), HTML5, CSS3, TypeScript, React.js, Redux Toolkit, Next.js, Webpack, Tailwind CSS, Material UI, Zustand, Accessibility, Razorpay, Kaleyra, MCube.
- **Backend & APIs:** Node.js, FastAPI, REST APIs, GraphQL, Prisma, Sequelize,
- **Databases & Cloud:** PostgreSQL, MySQL, MongoDB, Supabase, AWS (S3, EC2, Lambda)
- **Testing & Tooling:** Jest, Jasmine, WebDriver, Chrome DevTools, Git, CI/CD, GitHub
- **AI & Analytics:** OpenAI API, Prompt Engineering, ChatGPT, Claude, Metabase

WORK EXPERIENCE

Software Engineer - Nighthack Labs (June 2024 - Present)

1. Land Valuation System (Ongoing)

- Led end-to-end development of a valuation platform for banking clients, managing a 4-member team and overseeing frontend, backend, and overall system architecture.
- Developed valuation forms and dynamic UI screens using React, TypeScript, and Material UI.
- Integrated AI-driven document valuation using OpenAI APIs and applied prompt engineering to improve extraction accuracy. Debugged and resolved complex UI, state, and performance issues in production environments.
- Collaborated with backend and data teams to streamline model output visualization, reducing manual review time by 35%.
- Conducted regular code reviews and sprint planning, ensuring timely delivery and cross-functional alignment.

2. Waste Management Platform(Ongoing)

- Built a responsive web application using React.js and Material UI, enabling seamless waste tracking and management.
- Developed dynamic tables and custom dashboards to display real-time data from the backend and Integrated REST APIs using FastAPI, improving data retrieval speed by 30%.
- Currently extending the platform to Android using React Native (Expo), reusing existing API layers and adapting UI components for mobile screen sizes and native interactions.

3. Document Analysis Platform (AI-based)

- Built a Next.js + TailwindCSS-based UI that allows users to upload and analyze documents using OpenAI APIs.
- Implemented private and public chat systems, enabling users to ask context-based questions.
- Integrated document sharing and access control based on user type, enhancing data privacy.
- Reduced user interaction time by 40% through intuitive UI and real-time suggestions.

4. Gold Valuation System

- Designed and implemented complex UI workflows for gold intake, live-rate valuation, and KYC verification.
- Integrated Kaleyra for OTP initiation and document verification workflows.
- Designed reliable payment UI flows with debounced Razorpay event listeners, handling retries, failures, and real-time status updates, reducing transaction errors by 25%.
- Developed dynamic tables and reusable components using React + TypeScript, improving code reusability by 40%.
- Integrated MCube for telesales, enabling click-to-call functionality from both customer and agent sides.
- Documented the entire frontend module for dev handoff and API usage.
- Used Redux Toolkit for state management, ensuring data consistency across the app.

Software Developer(Part-time) - ViviMart (Jan 2024 -March 2024)

- Architected and developed mobile applications, collaborating across teams to ensure code quality, scalability, and timely delivery.

Software Developer - Itera Solutions (Apr 2023 - Sep 2023)

- Developed and maintained Full Stack MERN web app, optimized user interfaces for a seamless experience across devices and achieved a 75% faster page load.
- Contributed to agile processes, increased team efficiency by 30% and reduced project delivery timelines by 25%.
- Utilized Git for version control and code repository management, ensuring a streamlined and collaborative development workflow.
- Employed a Postgresql database to securely store data and user information.
- Applied RESTful APIs for smooth communication between the front-end and back-end systems, facilitated data exchange and user interactions.
- Managed email scheduling and implemented PDF/Excel exports with SQL Sequelize queries, enhanced data export capabilities. Improved PDF download performance by optimizing Sequelize queries.
- Maintained code standards, contributed to a 20% improvement in adherence.
- Contributed to automation testing (Jasmine), improved testing efficiency by 30%.

Frontend Developer Intern - Futuryze Digital Venture Studio Pvt Ltd (Nov 2022 - Feb 2023)

- Delivered mobile-responsive web pages using Tailwind CSS and React-Gatsby, achieved a 50% improvement in overall website performance through LazyLoading and optimized images in webp format.

Full Stack MERN Developer Trainee - EdYoda Digital University (Jan 2022 - June 2022)

- Established various projects by utilizing React-redux, including React-redux web and Clothing Web. Built interactive web applications like Food Meal Web and Quiz App.

TECHNICAL EXPERIENCE

- [HawkDoc](#) - Built a high-performance open source document editor using React,TS, and Meta's Lexical framework optimized for large documents and low latency editing. Implemented real-time collaboration using Yjs and Hocuspocus (CRDTs) with Redis and PSQL persistence. Added PDF export and template rendering and developed the project with Claude as an AI coding assistant.
- [AI Resume Analyser](#) - An AI powered web application that analyzes resumes, extracts key skills and experience, and helps recruiters shortlist candidates efficiently.
- [Clothing Web](#) - Designed a project using vanilla Js, HTML, and CSS, allowed users to add items to the cart and view details and total cost on the check-out page.
- [Food Meal Web](#) – Web application where data is added using an API, allowing users to search for desired meals and view recipe details and videos in the Modal tab.
- [Resume Processor](#) – Enabled users to upload resumes for keyword identification and filtering, streamlining the process of sorting and managing resumes.

CERTIFICATION & COURSES

- ReactJs** certification from [Namaste React](#) and [HackerRank](#).
- Basic in Python, Data Analysis & Data Visualization in Python - **Cognitive Class**.

EDUCATION

Master's of Science - Food Chemistry and Food Processing
Bachelor's of Science - Nutrition and Food Service Management

Loyola College
PSG College

Chennai,India
Coimbatore,India

HOBBIES

- Reading, baking, badminton, technical writing on [Dev.to](#).
